

CCRPC Transportation Advisory Committee

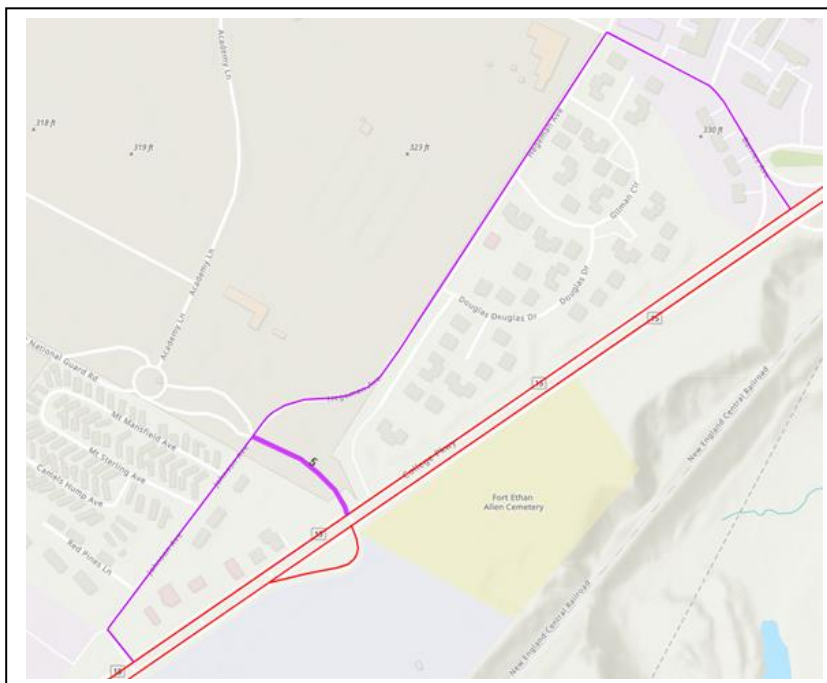

December 1, 2020

Additional Agenda Item: Action Item

Proposed Functional Classification Change

Issues

Transportation planners around the state were recently asked by VTrans to review proposed changes to the functional classification system. We were asked to have comments on the proposed changes back by December 11. You may recall CCRPC staff made numerous changes to Chittenden County's functional classification system a few years back. This works in our favor as there is only one small change being requested. It is to reclassify Vermont National Guard Road from VT 15 to the Hegeman/Johnson Ave intersection from Local Road to Major Collector (see below image of bolded pink/purple line). It appears this was inadvertently omitted when Campus Connector (connecting Hegeman & Johnson Avenues) was constructed. The Town of Colchester is in support of this change.

Staff Recommendation:

Recommend that the TAC approve the functional classification change of Vermont National Guard Road from VT 15 to Johnson/Hegeman Ave from Local Road to Major Collector.
