#### A. Introduction

The Chittenden County Transportation Improvement Program (TIP) for fiscal years 2022 through 2025 is a prioritized, fiscallyconstrained, and multi-year list of federally-funded, multimodal transportation projects and operations in the Chittenden County Regional Planning Commission (CCRPC) region - Chittenden County. As a federally designated Metropolitan Planning Organization (MPO), CCRPC must prepare a TIP which must cover at least a 4-year program of projects and be updated no less frequently than every 4 years. In addition, projects in the TIP must be prioritized at the regional level and have clearly identified funding sources. All transportation projects, programs, and operations receiving federal funds in Chittenden County must be authorized through the CCRPC TIP process. The exceptions are federal airport funds for Burlington International Airport, which are not subject to the CCRPC's prioritization process, but are listed in the TIP for information and coordination purposes.

- The TIP authorizes the implementing agency (e.g., Vermont Agency of Transportation (Trans), Green Mountain Transit (GMT)) to obligate federal funds for listed projects and operations over the next four federal fiscal years (October 1, 2021 through September 30, 2025).
- The first year of a duly-adopted and approved TIP constitutes an "agreed to" list of projects for project selection purposes, provided that anticipated federal funds available to the region are available during that year.
- The U.S. Department of Transportation (DOT) must find that the TIP is based on a continuing, comprehensive transportation planning process carried out cooperatively by the State, the CCRPC, and transit operators.

#### **B.** Financial Plan

#### Federal Funding

The majority of TIP projects are funded with 80 percent federal funds. However, in some cases federal amounts may vary such as with interstate projects, which can be funded with 90 percent federal funds, and some transit projects, which may be funded with 50 percent federal funds. There is a column on the right side of the TIP document that indicates the percentage shares of federal, state and local funding.

#### State Funding

The State of Vermont maintains a State Transportation Fund to pay for transportation programs and projects. State matching funds for TIP projects would most likely come from this fund. The fund is primarily supported by revenue collected from the motor fuel tax on gasoline and diesel and purchase and registration fees for motor vehicles.

State transportation resources are allocated through the state legislature's annual capital and budgetary process and are identified in the Transportation Capital Program. State transportation funding allocated to projects and programs in Chittenden County is determined through this process, in consultation with the CCRPC.

#### Local Funding

Sources of local matching funds come primarily from the property tax and are approved by each municipality in their annual budgeting process.

#### Operation and Maintenance

Operations and maintenance of the Federal Aid Highway System in Chittenden County is conducted by VTrans and funding amounts are identified in the State Transportation Improvement Program (STIP).

GMT has an estimated Operations and Maintenance budget for transit services in FY22 of \$14,632,653. Revenue sources for transit operations and maintenance are as follows:

Passenger revenue	\$1,124,016
Purchase of service	\$43,939
Local funding	\$3,990,790
State funding	\$2,318,542
Federal grants	\$7,151,416
Misc revenue	<u>\$3,950</u>
Total Revenue	\$14,632,653

#### C. Performance Management

#### Transportation Performance Measures Overview

The Moving Ahead for Progress in the 21<sup>st</sup> Century (MAP-21) Act of 2012 directed the U.S. Department of Transportation to establish a set of Performance Measures to increase the accountability and transparency of the federal highway and transit programs and improve project decision-making through performance-based planning and programming. The Fixing America's Surface Transportation Act (FAST Act) of 2015 continued the performance management and performance-based planning and programming requirements of MAP-21 with minor changes.

MAP-21 and FAST ACT require incorporation of performance-based planning and programming in the development of MPO long-range transportation plans and TIPs. The federal regulations also require the TIP to include, to the maximum extent practicable, a description of the anticipated effect of the TIP toward achieving the established performance measures targets.

CCRPC recognizes the importance of linking investment priorities to stated performance objectives, and that establishing this link is critical to the achievement of national transportation goals and statewide and regional performance targets. CCRPC works with the VTrans and GMT – transit provider in the MPO area – to carry out performance-based planning as outlined in federal rules. This planning process reflects the goals and objectives of regional and state plans including the *CCRPC ECOS Regional Plan*, which incorporates the *Metropolitan Transportation Plan*, the 2040 Vermont Long-Range Transportation Plan, the Vermont Strategic Highway Safety Plan, the VTrans Transportation Asset Management Plan, and the GMT Transit Asset Management Program (TAMP).

VTrans, CCRPC and other stakeholders collaborated to develop statewide Performance targets for the Safety, Pavement Condition, Bridge Condition, Travel Time Reliability and Freight Movement Performance Measures. The CCRPC voted to accept the state Performance targets and support them through programming of the TIP. GMT, in collaboration with CCRPC and VTrans, developed Transit performance targets for transit asset conditions and state of good repair. GMT's program for satisfying their performance targets are detailed in the most recent *TAMP*, approved November 2018. The *TAMP* uses the condition of assets to guide the optimal prioritization of funding to keep the transit system in a state of good repair.

TIP projects are anticipated to contribute positively to the overall MPO and statewide safety, asset management, and transit performance targets as discussed below.

#### **Transportation Performance Measures**

Safety – The safety performance goal seeks to achieve a significant reduction in traffic fatalities and serious injuries on public roads. Safety targets were the first to be established and reported to FHWA by all DOTs and MPOs. VTrans, in collaboration with the CCRPC, established the first statewide safety targets in the summer of 2017 and reported these targets to FHWA in the Highway Safety Improvement Program (HSIP) report. The CCRPC Board acted at their February 2018 meeting to accept those statewide safety targets for the metropolitan planning area. In February 2020, and again in February 2021, the CCRPC Board voted to accept the statewide safety targets set in the 2020 HSIP report for the Metropolitan planning area. The safety performance measures are listed below.

- Number of Fatalities
- Rate of Fatalities
- Number of Serious Injuries
- Rate of Serious Injuries
- Number of Non-Motorized Fatalities and Serious Injuries

Vermont has determined that it has made significant progress towards meeting its 2019 safety performance targets. Vermont met one target, serious injury rate (target-3.9, actual-3.796), but did not meet the remaining four targets, number of fatalities (target-56, actual-60.8), fatality rate

(target-0.8, actual-0.831), serious injuries (target-265, actual-277.8), or non-motorized fatalities and serious injuries (target-35, actual-39.8).

While four safety targets were not met Vermont remains committed to investing in projects that will improve transportation safety. This includes over \$91 million in the FY2022-2025 TIP for improvements at 14 High Crash Locations in the county. The TIP also includes over \$4.3 million for separated paths and sidewalk projects that will improve safety for pedestrian and bicyclists.

Infrastructure Condition – The infrastructure condition performance goal seeks to maintain the highway infrastructure system in a state of good repair. VTrans, in collaboration with the CCRPC, developed the statewide targets for the NHS pavement and bridge measures and these targets were submitted to FHWA on April 30, 2018. The CCRPC Board voted on October 17, 2018, to accept the statewide targets for the NHS pavements and bridges for the MPO area. The infrastructure condition performance measures are listed below.

#### Pavement Condition

- Percentage of pavements on the Interstate in good condition
- Percentage of pavements on the Interstate in poor condition
- Percentage of pavements on the non-Interstate National Highway System (NHS) in good condition
- Percentage of pavements on the non-Interstate National Highway System (NHS) in poor condition

#### Bridge Condition

- Percentage of NHS bridges in good condition
- Percentage of NHS bridges in poor condition

Vermont provided a Mid Performance Period Progress (MPP) Report in September 2020. In this report all 2-year condition/performance targets were met, and progress is being made towards the 4-year targets.

The FY2022-2025 TIP includes over \$31 million for paving projects and \$12.9 million for bridge preservation projects.

**Congestion** -- Not required because Vermont does not exceed national air quality standards

National Highway System Reliability – The system reliability goal seeks to improve the efficiency of the surface transportation system. The performance measures in this category are:

- Interstate NHS Travel Time Reliability
- Non-Interstate NHS Travel Time Reliability
- Interstate NHS Truck Travel Time Reliability Index

VTrans, in collaboration with the CCRPC, developed the statewide targets for NHS travel time reliability for passenger vehicles and freight movements and these targets were submitted to FHWA on May 14, 2018. The CCRPC Board voted at their October 17, 2018, meeting to accept the statewide targets for the MPO area.

In Vermont's MPP the 2-year targets for these measures were met and progress is being made toward the 4-year targets.

The FY2022-2025 TIP includes projects in the categories of intelligent transportation systems and traffic operations that improve the operations of existing infrastructure. It also includes improvements at four interstate interchanges, Exit 12, Exit 14, Exit 16 and Exit 17, to improve access in the vicinity of I-89.

Transit Asset Management – The Federal Transit Administration's (FTA) Performance Management Program establishes a system to monitor and manage public transportation assets for improved safety, reliability and performance with the goal of maintaining transit assets in a State of Good Repair (SGR). Under this program, every transit agency must develop a transit asset management (TAM) plan if it owns, operates, or manages capital assets used to provide public transportation and receives federal financial assistance. Each TAM Plan should include:

- An outline on how people, processes, and tools come together to address asset management policy and goals
- Provide accountability and visibility for furthering understanding of leveraging asset management practices
- Support planning, budgeting, and communications to internal and external stakeholders

The GMT Board approved the TAM Plan at their meeting on November 20, 2018. The CCRPC Board voted to accept the targets set in GMT's TAM plan during their September 18, 2019 meeting. The transit performance measures are listed below.

- Percent of revenue vehicles that have met or exceeded their useful life
- Percentage of non-revenue vehicles and equipment that have met or exceeded their useful life

The FY2022-2025 TIP includes \$61.5 million for transit projects including bus and van replacements, bus facility upgrades and transit services.

## CHITTENDEN COUNTY REGIONAL PLANNING COMMISSION A Resolution to Adopt the FY2022-2025 TRANSPORTATION IMPROVEMENT PROGRAM

WHEREAS, the Chittenden County Regional Planning Commission, as the designated Metropolitan Planning Organization for Chittenden County, Vermont, is responsible for the operation and maintenance of a continuing transportation planning process designed to prepare and adopt transportation plans and programs; and

WHEREAS, a fiscally constrained Transportation Improvement Program containing transportation improvements expected to be carried out in the period October 1, 2021 through September 30, 2025 has been prepared through the planning process; and

WHEREAS, the Chittenden County Regional Planning Commission's Transportation Advisory Committee found the projects contained in the proposed TIP to be in conformance with the duly adopted Metropolitan Transportation Plan and has recommended the fiscally constrained 2022-2025 Transportation Improvement Program to the Chittenden County Regional Planning Commission for adoption; and

WHEREAS, the Chittenden County Regional Planning Commission sent notice of availability of the proposed TIP to the eighteen member municipalities for the review and comment period on June 17, 2021; and

WHEREAS, the Chittenden County Metropolitan Planning Organization held a public hearing on Wednesday, July 21, 2021 to review the proposed Transportation Improvement Program after publishing a legal notice in the *Burlington Free Press* on June 18, 2021:

NOW, THEREFORE, BE IT RESOLVED that the Chittenden County Regional Planning Commission, as the Metropolitan Planning Organization, hereby adopts the fiscally constrained 2022-2025 Transportation Improvement Program attached hereto and made a part hereof.

RESOLVED, PASSED AND ADOPTED THIS 21th DAY OF JULY 2021.

CHITTENDEN COUNTY REGIONAL PLANNING COMMISSION

By		
-	Michael O'Brien, CCRPC CHAIR	

#### **GLOSSARY**

ADA	Americans with Disabilities Act of 1990. Federal legislation prohibiting discrimination on the basis of disability.	FAA	Federal Aviation Administration. The USDOT agency responsible for aviation related programs.
Adaptive Signal Control AIP	Adaptive signal control technology adjusts the timing of red, yellow and green lights to accommodate changing traffic patterns and ease traffic congestion.  Airport Improvement Program. FAA program that assists the development of public-use airports by providing funding for airport planning and development projects.	FAST Act	The Fixing America's Surface Transportation (FAST) Act is five-year legislation to improve the Nation's surface transportation infrastructure, including our roads, bridges, transit systems, and rail transportation network. The act was passed in 2015.
BTV	Burlington International Airport	FHWA	Federal Highway Administration. The USDOT agency responsible for roadway related programs.
CARES Act	The Coronavirus Aid, Relief, and Economic Security (CARES) Act, signed on March 27, 2020, provides relief funding for individuals, businesses, and government organizations affected by the COVID-19 pandemic.	FRA	Federal Railroad Administration. The USDOT agency responsible for railroad programs.
CCRPC	Chittenden County Regional Planning Commission. The county's comprehensive planning organization. Established under state	FTA	Federal Transit Administration. The USDOT agency responsible for public transportation programs.
	law. CCRPC also acts as the Metropolitan Planning Organization for Chittenden County. The MPO is established under federal law and responsible for transportation planning and programming within its jurisdiction.	FTA Section 5307	The Urbanized Area Formula Funding program makes federal resources available to urbanized areas and to governors for transit capital and operating assistance in urbanized areas and for transportation-related planning. An urbanized area is an incorporated area with a population of 50,000 or more.
CIRC Alternative Project	A program of projects to implement the purpose and need that the CIRC highway was originally intended to address. In 2011 the Governor announcement that the Chittenden County Circumferential Highway – as originally conceived - would not be built.	FTA Section 5309	FTA program that provides funding to states and transit agencies to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities.
CMAQ	Congestion Mitigation and Air Quality Improvement Program. Federal funding program designed to address congestion and air quality issues through capital and operating projects.	FTA Section 5310	FTA program that provides formula funding to states and local governments to meet the transportation needs of older adults and people with disabilities. Funds are apportioned based on each state's share of the population for these two groups.
CON	Construction. Project development phase in which the project is implemented.	FTA Section 5311	FTA program that provides capital, planning, and operating assistance to states to support public transportation in rural areas with populations loss than 50,000
DDI	Diverging diamond interchange. DDI is a new type of diamond interchange that increases capacity and reduces congestion.	5311	with populations less than 50,000.

#### **GLOSSARY**

FTA Section 5312	FTA program that provides funding to develop innovative products and services assisting transit agencies in better meeting the needs of their customers.	MPO	Metropolitan Planning Organization. Federally established organization responsible for a cooperative, continuous, and comprehensive framework to make transportation investment decisions within their designated area. CCRPC is the designated MPO for Chittenden County.
FTA Section 5339	FTA funding program that provides capital funding to replace, rehabilitate and purchase buses and related equipment and to construct bus related facilities. Funding is provided through formula allocations and competitive grants.	NHPP	National Highway Preservation Program. The NHPP provides support for the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the
GMT	Green Mountain Transit. The region's public transportation provider.		achievement of performance targets established in a State's asset management plan for the NHS.
HSIP	Highway Safety Improvement Program (HSIP). A data-driven, strategic approach to improving highway safety on all public roads that focuses on performance.	NHS	National Highway System. The NHS includes the Interstate Highway System as well as other roads important to the nation's economy, defense, and mobility. The NHS was developed by the
ISTEA	Intermodal Surface Transportation Efficiency Act of 1991. Federal legislation emphasizing innovation, intermodalism, and		Department of Transportation in cooperation with the states, local officials, and metropolitan planning organizations.
	flexibility. The Act authorized \$151 billion over 6 years.	Para- transit	A demand-response transportation system catering to special needs populations such as the elderly and disabled.
ITS	Intelligent Transportation Systems. The application of technology to improve transportation system efficiency.	PE	Preliminary Engineering. Project development phase in which project design is determined.
LTAP	Local Technical Assistance Program. A national non-profit effort financed jointly by the Federal Highway Administration and individual State Departments of Transportation. Its purpose is to provide road and bridge know-how to municipal people involved with highways. There are LTAP Centers in 50 states and Puerto	Round- about	Non-signalized circular intersection with specific design and traffic control features to ensure low travel speeds and efficient traffic movement.
	Rico and seven Native American locations. Vermont's program is called Vermont Local Roads.	ROW	Right-of-Way. A phase in the project development process that determines if land rights are needed for construction of a transportation project and negotiates the appropriate
MAB	Municipal Assistance Bureau. VTrans program established to assist local governments with project implementation.		compensation.
MAP-21	The Moving Ahead for Progress in the 21st Century Act (MAP-21) was a funding and authorization bill to govern United States federal surface transportation spending. It was passed by Congress on June 29, 2012.	SAFETEA- LU	Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFTEA-LU). This act was passed in August 2005 as the successor to the Transportation Efficiency Act for the 21st Century (TEA-21). The Act added new safety programs, with an emphasis on transportation security.

#### GLOSSARY

Safety Program	Under Sections 154 and 164 of the US Code penalty funds for Open Container and Repeat Offender Laws may be used for Highways Safety Improvement Program (HSIP) eligible activities.		relationships between transportation, community and system preservation.
Scoping	A phase in the project development process that moves a recognized problem from an idea through the development of alternatives and environmental screening.	TDM	Transportation Demand Management. The general term for strategies that result in more efficient use of transportation resources.
Shared Use Path	A path separated from vehicle traffic by barrier or open space usually on its own right-of-way.	TEA 21	Transportation Equity Act for the 21st Century (TEA-21) replaced ISTEA to guide federal expenditures for surface transportation in 1999. The Act authorized new flexible programs and increased authorized funding to \$198 billion over 6 years.
SSTA	Special Services Transportation Agency. Chittenden County based non-profit paratransit provider.	TIP	Transportation Improvement Program. The four year list of fiscally constrained transportation projects planned for implementation in the region.
STIP	Statewide Transportation Improvement Program. The State's four year list of fiscally constrained transportation projects planned for implementation statewide.	TOD	Transit Oriented Design. High density and mixed use land development around transit system stops.
STP	Surface Transportation Program. Federal program providing flexible funding for projects on any Federal-aid highway, including the NHS, bridge projects on any public road, transit capital projects, and bus facilities.	Traffic Calming	A combination of measures to reduce the negative effects of vehicle use or to alter driver behaviors.
TAP	The Transportation Alternatives Program (TAP) provides funding for transportation alternatives, including pedestrian and bicycle facilities, improving non-driver access to public transportation, safe routes to school projects, and recreational trails.	TSM	Transportation Systems Management. Relatively low-cost improvements to improve transportation efficiency such as ITS applications or roundabouts.
TO COD	• •	USDOT	United States Department of Transportation
TCSP	Transportation, Community and System Preservation Program. Federal program that provides funding for planning grants, implementation grants, and research to investigate and address the	VTrans (or VAOT)	Vermont Agency of Transportation

#### **CCRPC FY2022-2025 TIP Funding for Federal Safety Programs**

Safety Funding Sources	FY22	FY23	FY24	FY25
Highway Safety Improvement Program (HSIP)	\$5,054,728	\$14,158,587	\$7,883,325	\$1,295,678
Section 130 Rail Grade Crossing	\$2,728,348	\$479,588		
Section 164 Penalty Funds*	\$6,500,000	\$3,505,065		
Safety Totals	\$14,283,076	\$18,143,240	\$7,883,325	\$1,295,678

Section 164 Safety Funds – These funds are set aside under a program (Section 164 of chapter 1 of Title 23) enacted to encourage States to enact Repeat Intoxicated Driver laws. A State which does not have a Repeat Intoxicated Driver law which meets the minimum penalties described in the Act by October 1, 2000, will have certain Federal-aid highway funds transferred to the State's Section 402 State and Community Highway Safety grant program. These funds may be used for qualifying safety projects.

### Federal Funds Actually Obligated in Chittenden County FY2011 - FY2020

#### **Funds by Project Use Category**

Uses	FY11	FY12	FY13	FY14	FY15	FY16	FY17	FY18	FY19	FY20	Total FY11-20	% of Total
