RE: Cost Proposal for Brownfields Groundwater Assessment, 600 Spear Street, South Burlington, Vermont

Dear Taylor,

LEE is pleased to present this cost proposal for Brownfields Groundwater Assessment at 600 Spear Street in South Burlington, Vermont. This proposal is based on information currently known about the Site and is due to a request from the Vermont Department of Environmental Conservation to conduct an additional round of groundwater sampling at the Site.

Pricing

LEE's cost estimate for a round of groundwater sampling is \$4,445. A task breakdown is included below:

Task	Cost
SSQAPP Preparation	\$ 900
Groundwater Sampling	\$1,995
Report Preparation	\$1,550

This pricing is provided subject to the following assumptions:

- A SSQAPP will be needed due to federal funding requirements.
- The four existing groundwater monitoring wells will be sampled for VOCs via EPA Method 8021b, and RCRA 8 metals via low-flow sampling techniques. No additional monitoring wells will be installed.
- All purge water is disposed of on-Site. If LEE needs to drum the investigation derived wastes and/or dispose of them in a different manner, there will be additional charges for that.
- The final report is issued electronically in PDF format. Hard copies can be provided for an additional fee to cover the printing.

Mr. Taylor Newton
