

## Clerk's Report for 5/08/24

- **Williston resident requested CCCUD provide high speed internet service:** Ann Janda and Mike Vance crafted the following response that could be used again for future inquiries.

*The Chittenden County CUD is not currently providing high speed internet service. As you may or may not be aware the CCCUD was established in 2021 to find a way to use publicly available grant funds from the American Rescue Plan Act and future federal funding sources like the BEAD program to fund high speed internet to the sites that are considered unserved or underserved.*

*To that end it was determined that only about 700 to 800 residents are eligible to utilize this public funding. Most addresses today in Chittenden county are served by CCI(Fidium) Comcast(Xfinity) or even Burlington telecom and we cannot use the public funds to bring high speed internet to sites that are considered served.*

*Based on the address you provided in your inquiry I believe you are served by Comcast. If you want another option we suggest you go to [www.fidium.com](http://www.fidium.com). If you are in an unserved area, then CCCUD is still working through the grant and partner process to identify a suitable provider who can bring high speed service to your area. We hope to have public announcements regarding our progress by the end of the year 2024.*

Respectfully submitted by

Ann Janda

CCCUD Clerk
