Summary of Funding Amounts

1. FY2027-2030 TIP Funding - Table: By Project Use Category p. 1
2. FY2027-2030 TIP Funding - Chart: By Project Use Category p. 2
3. CCRPC FY2027-2030 TIP: By Federal Funding Source and Fiscal Constraint Status p. 3
4. CCRPC FY2027-2030 TIP Funding for Federal Safety program p. 4
5. Federal Funds Actually Obligated in In Chittenden County: FY2016-2025 Funds by Project Use Category p. 5

A. Introduction

The Chittenden County Transportation Improvement Program (TIP) for fiscal years 2027 through 2030 is a prioritized, fiscally-constrained, and multi-year list of federally-funded, multimodal transportation projects and operations in the Chittenden County Regional Planning Commission (CCRPC) region - Chittenden County. As a federally designated Metropolitan Planning Organization (MPO), CCRPC must prepare a TIP which must cover at least a 4-year program of projects and be updated no less frequently than every 4 years. In addition, projects in the TIP must be prioritized at the regional level and have clearly identified funding sources. All transportation projects, programs, and operations receiving federal funds in Chittenden County must be authorized through the CCRPC TIP process.

- The TIP authorizes the implementing agency (e.g., Vermont Agency of Transportation (Trans), Green Mountain Transit (GMT)) to obligate federal funds for listed projects and operations over the next four federal fiscal years (October 1, 2026 through September 30, 2030).
- The first year of a duly-adopted and approved TIP constitutes an "agreed to" list of projects for project selection purposes, provided that anticipated federal funds available to the region are available during that year.
- The U.S. Department of Transportation (DOT) must find that the TIP is based on a continuing, comprehensive transportation planning process carried out cooperatively by the State, the CCRPC, and transit operators.

B. Financial Plan

Federal Funding

The majority of TIP projects are funded with 80 percent federal funds. However, in some cases federal amounts may vary such as with interstate projects, which can be funded with 90 percent federal funds, and some transit projects, which may be funded with 50 percent federal funds. There is a column on the right side of the TIP document that indicates the percentage shares of federal, state and local funding.

State Funding

The State of Vermont maintains a State Transportation Fund to pay for transportation programs and projects. State matching funds for TIP projects would most likely come from this fund. The fund is primarily supported by revenue collected from the motor fuel tax on gasoline and diesel and purchase and registration fees for motor vehicles.

State transportation resources are allocated through the state legislature's annual capital and budgetary process and are identified in the Transportation Capital Program. State transportation funding allocated to projects and programs in Chittenden County is determined through this process, in consultation with the CCRPC.

Local Funding

Sources of local matching funds come primarily from the property tax and are approved by each municipality in their annual budgeting process.

Operation and Maintenance

Operations and maintenance of the Federal Aid Highway System in Chittenden County is conducted by VTrans and funding amounts are identified in the State Transportation Improvement Program (STIP).

GMT has an estimated Operations and Maintenance budget for transit services in FY27 of $20,985,156. Revenue sources for transit operations and maintenance are as follows:

Passenger revenue	$2,094,148
Purchase of service	$25,800
Local funding	$4,478,177
State funding	$2,209,375
Federal grants	$12,171,456
Misc revenue	$6,200
Total Revenue	$20,985,156

C. Performance Management

Transportation Performance Measures Overview

The Moving Ahead for Progress in the 21st Century (MAP-21) Act of 2012 directed the U.S. Department of Transportation to establish a set of Performance Measures to increase the accountability and transparency of the federal highway and transit programs and improve project decision-making through performance-based planning and programming. Subsequent transportation acts have continued the performance management and performance-based planning and programming requirements of MAP-21 with minor changes.

Federal regulations require incorporation of performance-based planning and programming in the development of MPO long-range transportation plans and TIPs. The federal regulations also require the TIP to include, to the maximum extent practicable, a description of the anticipated effect of the TIP toward achieving the established performance targets.

CCRPC recognizes the importance of linking investment priorities to stated performance objectives, and that establishing this link is critical to the achievement of national transportation goals and statewide and regional performance targets. CCRPC works with VTrans and GMT – transit provider in the MPO area – to carry out performance-based planning as outlined in federal rules. This planning process reflects the goals and objectives of regional and state plans including the *CCRPC ECOS Regional Plan*, which incorporates the *Metropolitan Transportation Plan*, the *2040 Vermont Long-Range Transportation Plan*, the *Vermont Strategic Highway Safety Plan*, the *VTrans Transportation Asset Management Plan*, and the *GMT Transit Asset Management Program (TAMP)*.

VTrans, CCRPC and other stakeholders collaborated to develop statewide Performance targets for the Safety, Pavement Condition, Bridge Condition, Travel Time Reliability and Freight Movement Performance Measures. The CCRPC voted to accept the state Performance targets and support them through programming of the TIP. GMT, in collaboration with CCRPC and VTrans, developed Transit performance targets for transit asset conditions and state of good repair. GMT's program for satisfying their performance targets are detailed in the most recent *TAMP*. The *TAMP* uses the condition of assets to guide the optimal prioritization of funding to keep the transit system in a state of good repair.

TIP projects are anticipated to contribute positively to the overall MPO and statewide safety, asset management, and transit performance targets as discussed below.

Transportation Performance Measures

Safety – The safety performance goal seeks to achieve a significant reduction in traffic fatalities and serious injuries on public roads. VTrans, in collaboration with the CCRPC, establishes statewide safety targets and reports them to FHWA in the Highway Safety Improvement Program (HSIP) report. The CCRPC Board has voted to continue to accept the statewide safety targets set in the most recent HSIP report for the Metropolitan planning area. The safety performance measures are listed below.

- Number of Fatalities
- Rate of Fatalities
- Number of Serious Injuries
- Rate of Serious Injuries
- Number of Non-Motorized Fatalities and Serious Injuries

Traffic safety remains a significant concern in Vermont and Chittenden County, with fatalities and serious injuries remaining elevated compared with pre-pandemic levels. In response, VTrans and CCRPC continue to prioritize investments that address roadway safety and advance a Safe System approach. CCRPC completed a Regional Safety Action Plan in 2026 that focused on reducing fatal and serious-injury crashes through data-driven safety improvements, policies, programs, and projects.

The FY2027-2030 TIP includes substantial investment in safety-related improvements. This includes $43.6 million for Safety/Traffic Operations/ITS projects in 12 locations in the county. The TIP also includes $8.1 million for separated paths and sidewalk projects that will improve safety for pedestrians and bicyclists.

Infrastructure Condition – The infrastructure condition performance goal seeks to maintain the highway infrastructure system in a state of good repair. VTrans, in collaboration with the CCRPC, develops the statewide targets for the NHS pavement and bridge measures and these targets are submitted annually to FHWA. The CCRPC Board accepted the statewide targets for the NHS pavements and bridges for the MPO area. The infrastructure condition performance measures are listed below.

- **Pavement Condition**
  - Percentage of pavements on the Interstate in good condition
  - Percentage of pavements on the Interstate in poor condition
  - Percentage of pavements on the non-Interstate National Highway System (NHS) in good condition
  - Percentage of pavements on the non-Interstate National Highway System (NHS) in poor condition

- **Bridge Condition**
  - Percentage of NHS bridges in good condition
  - Percentage of NHS bridges in poor condition

Vermont's Transportation Asset Management Plan establishes a performance-based approach to managing pavement and bridge assets and maintaining the transportation system in a state of good repair.

The FY2027-2030 TIP includes $50.4 million for paving projects and $77.8 million for bridge preservation projects.

Congestion -- *Not required because Vermont does not exceed national air quality standards*

National Highway System Reliability – The system reliability goal seeks to improve the efficiency of the surface transportation system. The performance measures in this category are:

- Interstate NHS Travel Time Reliability
- Non-Interstate NHS Travel Time Reliability
- Interstate NHS Truck Travel Time Reliability Index

VTrans, in collaboration with the CCRPC, developed the statewide targets for travel time reliability for passenger vehicles and freight movements and these targets were submitted to FHWA. The CCRPC Board voted to accept the statewide targets for the MPO area.

The FY2027-2030 TIP includes projects in the categories of intelligent transportation systems and traffic operations that improve the operations of existing infrastructure. It also includes improvements at I-89 Exit 16 which improves access in the vicinity of I-89.

GHG Transportation Performance Target -- In 2023 the Federal Highway Administration created a greenhouse gas

(GHG) performance measure as part of a Transportation Performance Management Program. The GHG performance measure is the percent change in tailpipe Carbon Dioxide (CO_2) emissions on the National Highway System (NHS) compared to the reference year of calendar year 2022. VTrans developed a Carbon Reduction Strategy with two objectives: 1) meet the federal requirements to most effectively allocate the Carbon Reduction Program funds to support reduction of transportation emissions in Vermont; and 2) support the State's requirements for GHG emissions reductions as articulated in the Global Warming Solutions Act (GWSA). Upon completion of the Carbon Reduction Strategy, VTrans established their initial performance target of 4% GHG reduction (-4%) for the 2022-2025 period. This was submitted to FHWA in February 2024. The CCRPC Commission voted to accept the State's performance target.

Transit Asset Management – The Federal Transit Administration's (FTA) Performance Management Program establishes a system to monitor and manage public transportation assets for improved safety, reliability and performance with the goal of maintaining transit assets in a State of Good Repair (SGR). Under this program, every transit agency must develop a transit asset management (TAM) plan if it owns, operates, or manages capital assets used to provide public transportation and receives federal financial assistance. Each TAM Plan should include:

- An outline on how people, processes, and tools come together to address asset management policy and goals
- Provide accountability and visibility for furthering understanding of leveraging asset management practices
- Support planning, budgeting, and communications to internal and external stakeholders

GMT's current TAM Plan covers the period through September 30, 2026. Staff will present an updated TAM Plan for the period through September 30, 2030 to the GMT Board for approval at their upcoming meeting on September 15, 2026. The transit performance measures in the proposed plan are listed below.

- Percent of revenue vehicles that have met or exceeded their useful life. The FY27 goal is 32%.
- Percentage of non-revenue vehicles and equipment that have met or exceeded their useful life. The FY27 goal is 18%.
- Percent of Trucks and other rubber tire vehicles that have met or exceeded their useful life. The FY27 goal is 11%.

The FY2027-2030 TIP includes $87.1 million for transit projects including bus and van replacements, bus facility upgrades and transit services.

Public Transportation Agency Safety Plan – In July 2018, the Federal Transit Administration (FTA) published the Public Transportation Safety Plan (PTASP) final rule, which requires certain operators of public transportation systems that receive federal funds under FTA's Urbanized Area Formula Grants to develop safety plans that include the

processes and procedures to implement Safety Management Systems (SMS).

The GMT Board approved the GMT PTASP at their meeting on November 17, 2020, which details the safety processes and procedures for GMT. This plan utilizes existing agency safety practices and best practices to be implemented to meet the new regulation set in 49 CFR Part 673 of the federal guidelines.

The PTASP includes formal documentation to guide the agency in proactive safety management policy, safety risk management, safety assurance, and safety promotion. The goal is to provide management and employees a comprehensive, collaborative approach to managing safety. The plan includes the process and schedule for an annual review of the plan to review the safety performance measures and update processes that may be needed to improve the organization's safety practices. This document and its updates will be maintained for three years following their adoption and are subject to review by the FTA.

GMT has identified the safety performance targets in the PTASP for FY27 in the table below. Targets are based on the previous three years (2017-2019) of NTD reported data for GMT's Fixed Route, Commuter Bus, and Demand Response services. Safety performance targets shown are reflected in the most recent update to the PTASP, which was updated on March 18, 2025.

Investment in new capital assets are identified in the TIP which will greatly assist GMT's goal of meeting the safety performance targets. Implementation of a sustainable fleet replacement schedule will reduce the average age of the fleet and improve reliability and advance GMT's efforts to maintain the fleet in a state of good repair. Funding for preventive maintenance and capital support equipment will greatly support GMT's fleet maintenance activities to improve the safety and reliability of revenue rolling stock. Improvements to passenger amenities such as new shelters and solar lighting will greatly improve safety at bus stops in GMT's service area. GMT also intends to utilize operating funds identified in the TIP for safety and security support at its public facilities.

Safety Performance Targets

Specify performance targets based on the safety performance measures established under the National Public Transportation Safety Plan.

Mode of Transit Service	Fatalities (Total)	Fatalities 100,000 VRM	Injuries (Total)	Injuries 100,000 VRM	Safety Events (Total)	Safety Events 100,000 VRM	System Reliability (Mean distance between mechanical failure)
Motor Bus	0	0	1	0.062	1	0.062	18,096
CB	0	0	0	0.00	0	0.00	78,597
DR - DO	0	0	1	0.062	1	0.062	0
DR - PT	0	0	2	0.12	2	0.12	28,025

Notes: VRM – Vehicle Revenue Miles
CB – Commuter Bus
DR – Demand Response
DO – Directly Operated
PT – Purchased Transportation

CHITTENDEN COUNTY REGIONAL PLANNING COMMISSION
A Resolution to Adopt the FY2027-2030
TRANSPORTATION IMPROVEMENT PROGRAM

WHEREAS, the Chittenden County Regional Planning Commission, as the designated Metropolitan Planning Organization for Chittenden County, Vermont, is responsible for the operation and maintenance of a continuing transportation planning process designed to prepare and adopt transportation plans and programs; and

WHEREAS, a fiscally constrained Transportation Improvement Program containing transportation improvements expected to be carried out in the period October 1, 2026 through September 30, 2030 has been prepared through the planning process; and

WHEREAS, the Chittenden County Regional Planning Commission's Transportation Advisory Committee found the projects contained in the proposed TIP to be in conformance with the duly adopted Metropolitan Transportation Plan and has recommended the fiscally constrained 2027-2030 Transportation Improvement Program to the Chittenden County Regional Planning Commission for adoption; and

WHEREAS, the Chittenden County Regional Planning Commission sent notice of availability of the proposed TIP to the eighteen member municipalities for the review and comment period; and

WHEREAS, the Chittenden County Metropolitan Planning Organization held a public hearing on Wednesday, October 21, 2026 to review the proposed Transportation Improvement Program after publishing a legal notice in the *Burlington Free Press* on September __, 2026;

NOW, THEREFORE, BE IT RESOLVED that the Chittenden County Regional Planning Commission, as the Metropolitan Planning Organization, hereby adopts the fiscally constrained 2027-2030 Transportation Improvement Program attached hereto and made a part hereof.

RESOLVED, PASSED AND ADOPTED THIS 21th DAY OF October 2026.

CHITTENDEN COUNTY REGIONAL PLANNING COMMISSION

By _____
Bard Hill, CCRPC CHAIR

GLOSSARY

ADA	Americans with Disabilities Act of 1990. Federal civil rights law that prohibits discrimination against individuals with disabilities and establishes accessibility requirements for transportation and other public services.
Adaptive Signal Control	Adaptive signal control technology adjusts the timing of red, yellow and green lights to accommodate changing traffic patterns and ease traffic congestion.
CCRPC	Chittenden County Regional Planning Commission. The county's comprehensive planning organization. Established under state law. CCRPC also acts as the Metropolitan Planning Organization for Chittenden County. The MPO is established under federal law and responsible for transportation planning and programming within its jurisdiction.
CIRC Alternative Project	A program of projects to implement the purpose and need that the CIRC highway was originally intended to address. In 2011 the Governor announced that the Chittenden County Circumferential Highway – as originally conceived - would not be built.
CMAQ	Congestion Mitigation and Air Quality Improvement Program. Federal funding program designed to address congestion and air quality issues through capital and operating projects.
CON	Construction. Project development phase in which the project is implemented.
DDI	Diverging diamond interchange. DDI is a new type of diamond interchange that increases capacity and reduces congestion.
FAA	Federal Aviation Administration. The USDOT agency responsible for aviation-related programs.
Federal Fiscal Year (FFY)	The federal fiscal year, which begins October 1 and ends September 30 of the following calendar year.
FHWA	Federal Highway Administration. The USDOT agency responsible for roadway related programs.
Federal-Aid	Federal transportation funding provided for eligible transportation projects and programs.
Fiscal Constraint	The requirement that the cost of projects programmed in the TIP does not exceed reasonably available anticipated revenues.
FRA	Federal Railroad Administration. The USDOT agency responsible for railroad programs.
FTA	Federal Transit Administration. The USDOT agency responsible for public transportation programs.
FTA Section 5307	The Urbanized Area Formula Funding program makes federal resources available to urbanized areas and to governors for transit capital and operating assistance in urbanized areas and for transportation-related planning. An urbanized area is an incorporated area with a population of 50,000 or more.
FTA Section 5309	FTA program that provides funding to states and transit agencies to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities.
FTA Section 5310	FTA program that provides formula funding to states and local governments to meet the transportation needs of older adults and people with disabilities. Funds are apportioned based on each state's share of the population for these two groups.
FTA Section 5311	FTA program that provides capital, planning, and operating assistance to states to support public transportation in rural areas with populations less than 50,000.
FTA Section 5312	FTA program that provides funding to develop innovative products and services assisting transit agencies in better meeting the needs of their customers.
FTA Section 5339	FTA funding program that provides capital funding to replace, rehabilitate and purchase buses and related equipment and to construct bus related facilities. Funding is provided through formula allocations and competitive grants.

GLOSSARY

GMT Green Mountain Transit. The region's public transportation provider.

HSIP Highway Safety Improvement Program (HSIP). A data-driven, strategic approach to improving highway safety on all public roads that focuses on performance.

IIJA On November 15, 2021, President Biden signed the Infrastructure Investment and Jobs Act (IIJA) (Public Law 117-58, also known as the "Bipartisan Infrastructure Law") into law. The Bipartisan Infrastructure Law is the largest long-term investment in our infrastructure and economy in our Nation's history.

ITS Intelligent Transportation Systems. The application of technology to improve transportation system efficiency.

LTAP Local Technical Assistance Program. A national non-profit effort financed jointly by the Federal Highway Administration and individual State Departments of Transportation. Its purpose is to provide road and bridge know-how to municipal people involved with highways. There are LTAP Centers in 50 states and Puerto Rico and seven Native American locations. Vermont's program is called Vermont Local Roads.

MAB Municipal Assistance Bureau. VTrans program established to assist local governments with project implementation.

Municipal Highway and Stormwater Mitigation Program A Vermont grant program that provides funding to municipalities to assist in their efforts to improving the quality of state waters. Grants funded through this program must have a transportation link and eligible activities include pollution prevention, abatement, mitigation, and water pollution prevention or abatement.

MPO Metropolitan Planning Organization. Federally established organization responsible for a cooperative, continuous, and comprehensive framework to make transportation investment decisions within their designated area. CCRPC is the designated MPO for Chittenden County.

NEVI National Electric Vehicle Infrastructure Formula Program provides funding to states to strategically deploy electric vehicle (EV) chargers and to establish an interconnected network to facilitate data collection, access, and reliability.

NHPP National Highway Preservation Program. The NHPP provides support for the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State's asset management plan for the NHS.

NHS National Highway System. The NHS includes the Interstate Highway System as well as other roads important to the nation's economy, defense, and mobility. The NHS was developed by the Department of Transportation in cooperation with the states, local officials, and metropolitan planning organizations.

Obligation The federal commitment of funds for a transportation project or activity.

Para- transit A demand-response transportation system catering to special needs populations such as the elderly and disabled.

PE Preliminary Engineering. Project development phase in which project design is determined.

RAISE Grant Rebuilding American Infrastructure with Sustainability and Equity Discretionary Grant program provides funding for road, rail, transit and port projects that promise to achieve national objectives.

Round- about Non-signalized circular intersection with specific design and traffic control features to ensure low travel speeds and efficient traffic movement.

ROW Right-of-Way. A phase in the project development process that determines if land rights are needed for construction of a

GLOSSARY

	transportation project and negotiates the appropriate compensation.
Section 164 Safety Program	Under Sections 154 and 164 of the US Code penalty funds for Open Container and Repeat Offender Laws may be used for Highways Safety Improvement Program (HSIP) eligible activities.
Scoping	A phase in the project development process that moves a recognized problem from an idea through the development of alternatives and environmental screening.
Shared Use Path	A path separated from vehicle traffic by barrier or open space.
STIP	Statewide Transportation Improvement Program. The State's four year list of fiscally constrained transportation projects planned for implementation statewide. The TIP is wholly incorporated into the STIP.
STBG	The Surface Transportation Block Grant (STBG) program provides flexible funding that may be used by States and localities for projects to preserve and improve the conditions and performance on any Federal-aid highway and bridge projects on any public road, pedestrian and bicycle infrastructure, and transit capital projects.
TAP	The Transportation Alternatives Program (TAP) provides funding for transportation alternatives, including pedestrian and bicycle facilities, improving non-driver access to public transportation, safe routes to school projects, and recreational trails.
TCSP	Transportation, Community and System Preservation Program. Federal program that provides funding for planning grants, implementation grants, and research to investigate and address the relationships between transportation, community and system preservation.
TDM	Transportation Demand Management. The general term for strategies that result in more efficient use of transportation resources.
TIP	Transportation Improvement Program. The four year list of fiscally constrained transportation projects planned for implementation in the region.
TIP Administrative Modification	A minor change to a project or the TIP that does not require formal MPO approval or public participation under the TIP amendment procedures. An
TIP Amendment	A formal change to an approved TIP that requires approval in accordance with the MPO's TIP amendment procedures.
TOD	Transit Oriented Development. High density and mixed use land development around transit system stops.
Traffic Calming	A combination of measures to reduce the negative effects of vehicle use or to alter driver behaviors.
TSM	Transportation System Management. Relatively low-cost improvements to improve transportation efficiency such as ITS applications or roundabouts.
USDOT	United States Department of Transportation
VTrans (or VAOT)	Vermont Agency of Transportation
